

About Us

SSB Hardware Sdn Bhd, established in 2021, is in the business of manufacturing excellent home appliances and accessories, such as mount steel and mount stainless steel outdoor brackets for air conditioners, invisible grilles, and adjustable bases for washing machines and fridges.

Equipped with advanced manufacturing machinery, skilled operators, and comprehensive testing equipment, we consistently produce high-quality and reliable products that meet our customers' requirements. Our target market includes households and families using home appliances such as air conditioners, washing machines, and refrigerators. Additionally, we provide support to our business partners operating in the electrical and air-conditioning retail segment.

SSB's flagship products utilize stainless steel, exemplified by our stainless steel air-conditioning bracket. The anti-rust properties, durability, and hygiene of these stainless steel air-conditioning brackets make them visually pleasing when mounted to the wall.

CEILING AIR CIRCULATOR FAN

SSB-APT60-14YA

Breathe Easy with Perfect Airflow!

Product Overview

Introducing our innovative air circulator, designed to provide 360° air circulation for maximum comfort. This fan not only enhances airflow throughout your space but also helps you save on electricity consumption, making it an energy-efficient choice. Its compact design is perfect for installation in low-ceiling areas, ensuring safety and functionality without compromising on performance.

Key Benefits

- Space-Saving Design
- Energy Efficient
- Quiet Operation

Product Specifications

Specifications	Details
Distributor	SSB Hardware Sdn Bhd
Manufacturer	China
Model	Air Circulator
Speed Setting	3 Speeds
Rated Voltage	220V~50Hz
Air Flow	360 L/S
Fan Blade	14"
Motor Type	AC Motor
Noise	56dB(A)
Special Features	Oscillating, Timer
Weight	3.5 KG
Warranty	1 Year

Features and Benefits

Feature	Benefit
360° Air Circulation	Ensures comprehensive airflow, keeping every corner of the room comfortable.
Energy Efficient Design	Helps reduce electricity consumption, saving you money on energy bills.
Oscillating Function	Provides wider coverage by moving side to side, ensuring even air distribution.
Compact Size	Suitable for low ceiling installations and tight spaces without sacrificing performance.
Multiple Speed Settings	Offers customizable airflow options to suit individual preferences and needs.
Low Noise Operation	Ensures a quiet environment, making it perfect for bedrooms, offices, or study areas.

Dimension

Installations

1.

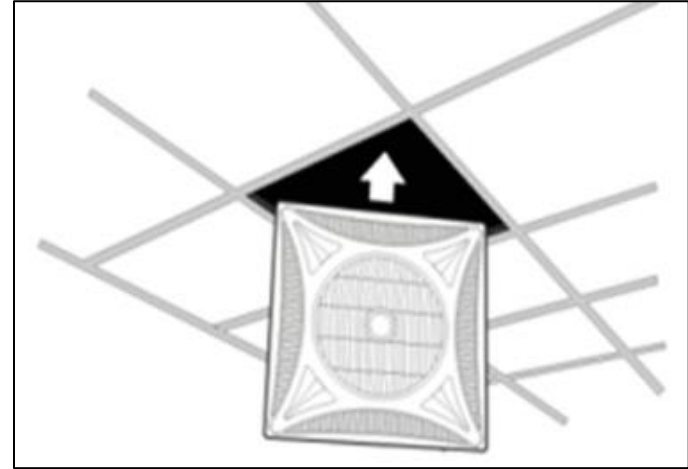

Installation on suspended ceiling

- Remove a piece of ceiling panel

Installation on plaster ceiling

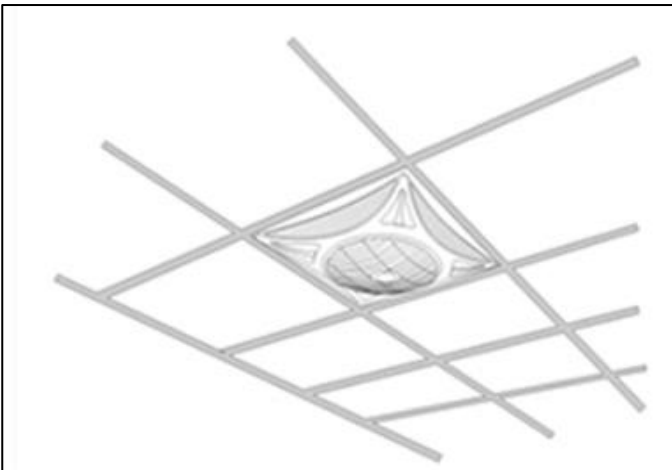

- Make a hole opening 576mm x 576mm
- Insert aluminum frame with glue or sealant around the hole opening

2.

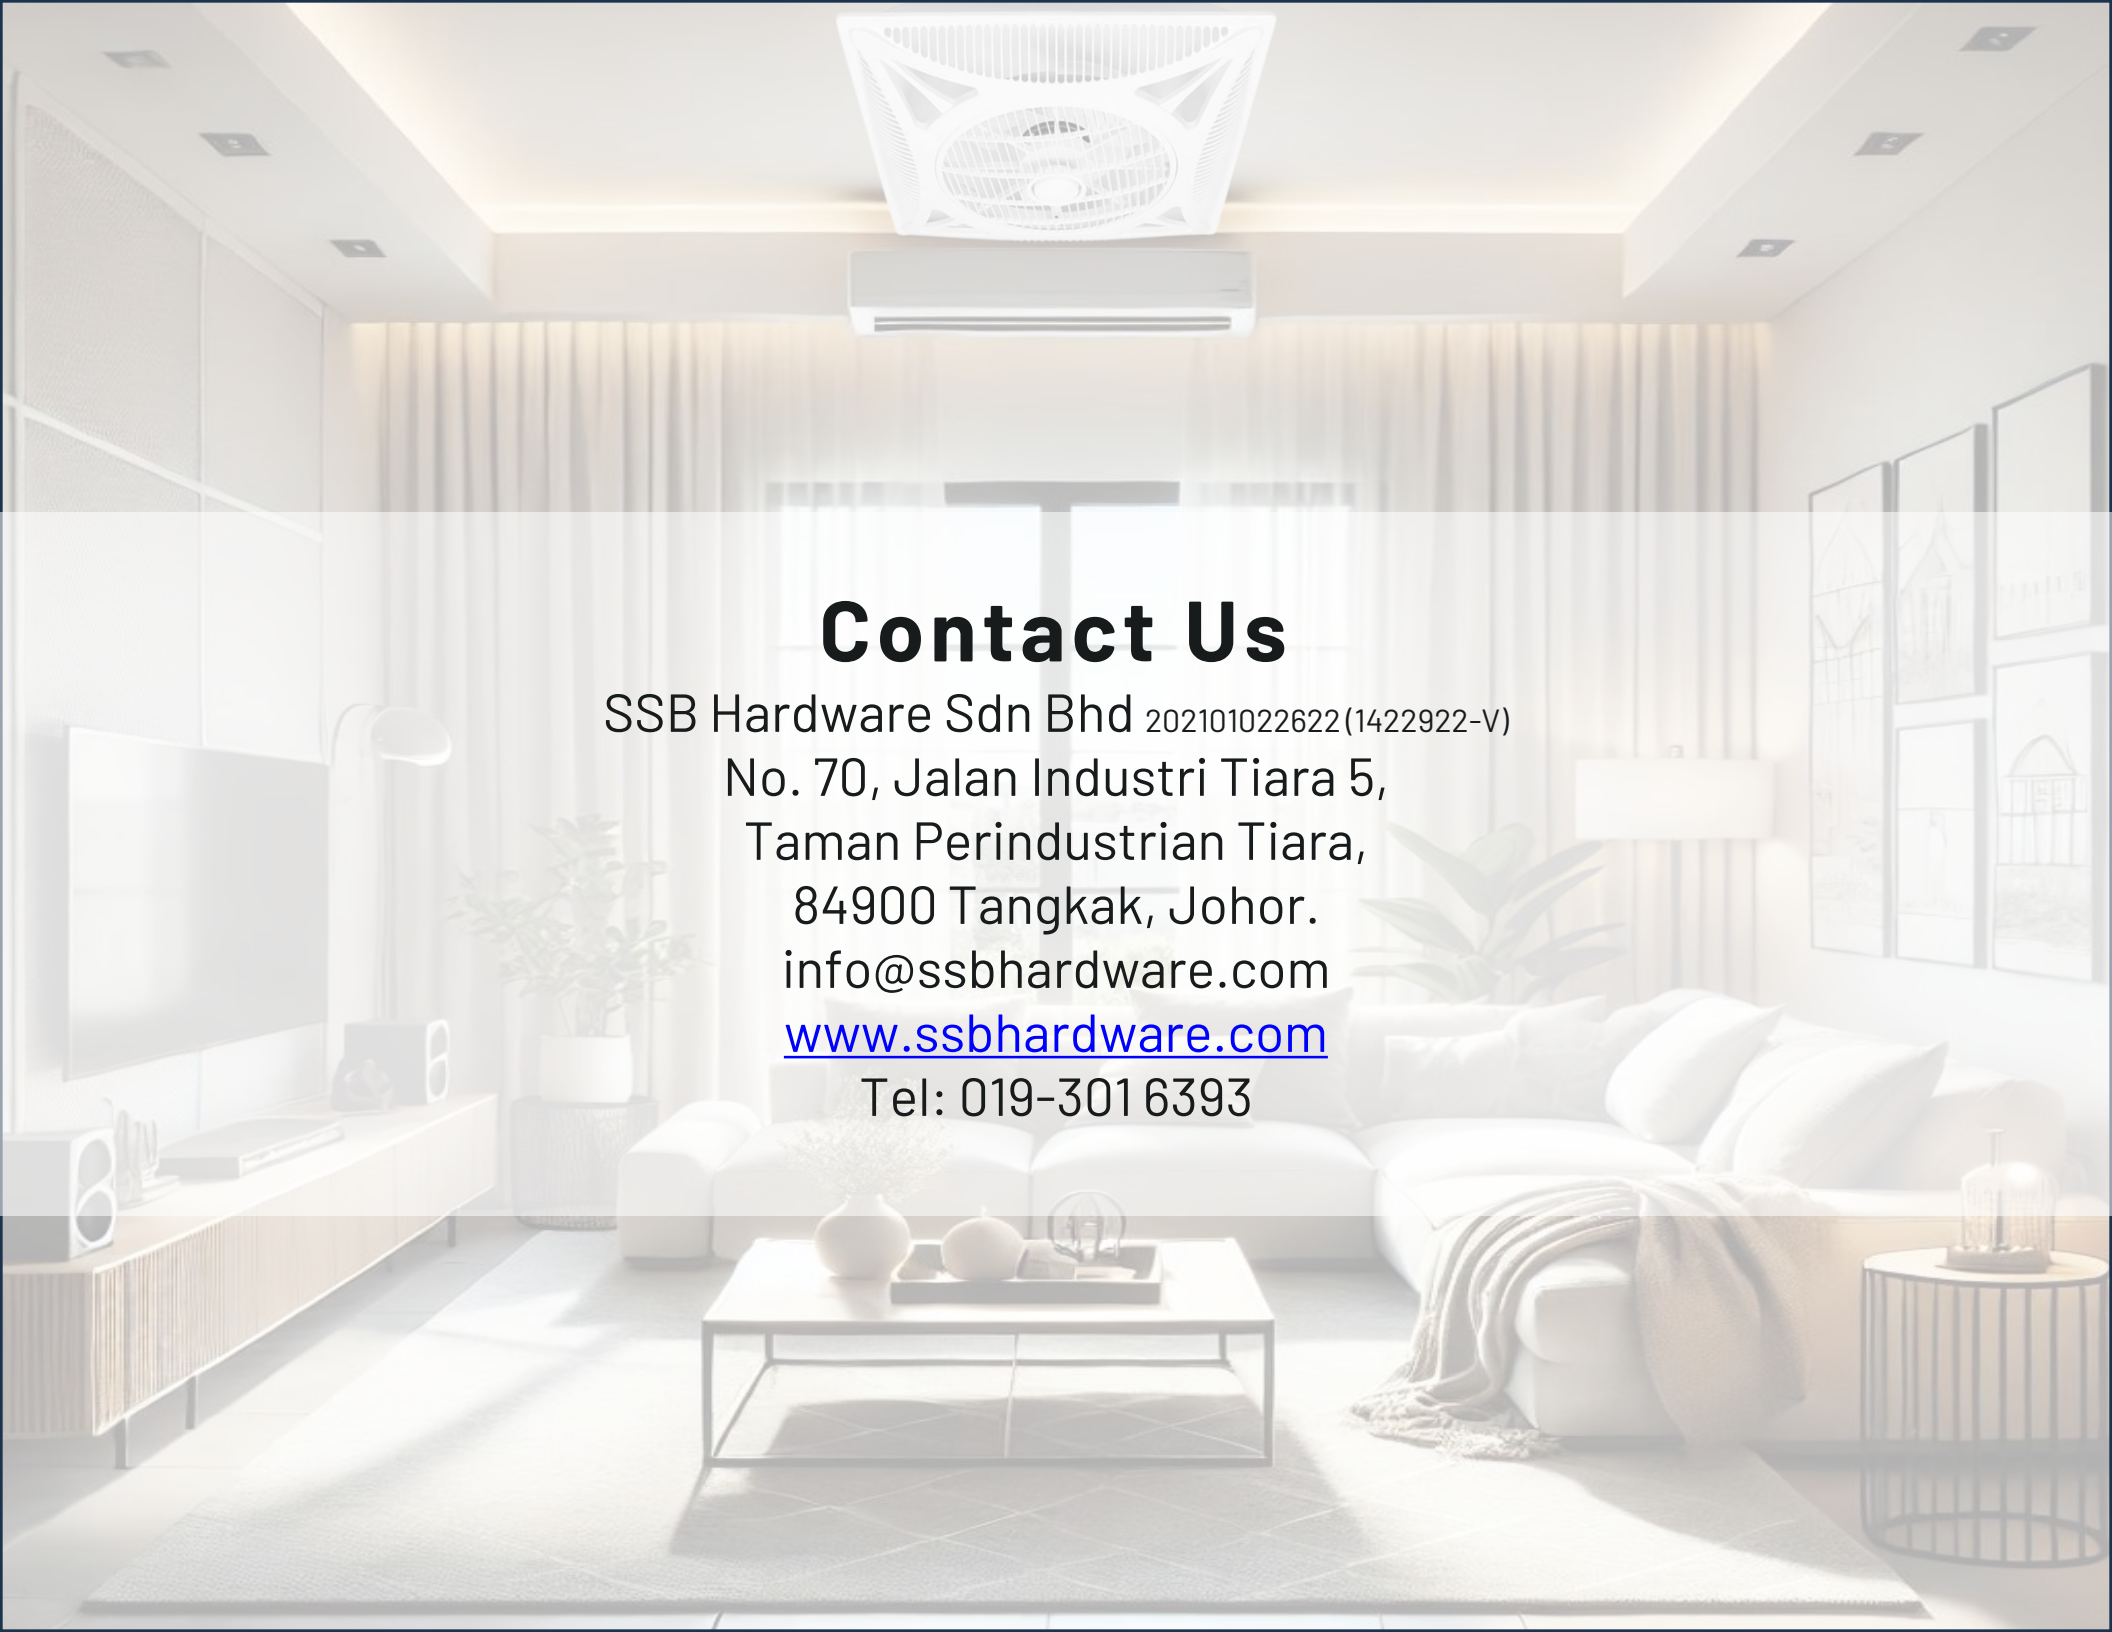

Put the circulating fan onto the opened ceiling

3.

Completed installation

A modern, minimalist living room with a white sectional sofa, a low wooden coffee table, and a large window with sheer curtains. A ceiling fan and an air conditioner are visible on the ceiling. The room is decorated with potted plants and framed artwork.
